

ENSIGN SHIP MODELS

The Ensign range of ship models offer both collectors and wargamers a series of detailed models at a reasonable price. Enabling many to whom ship model collecting was considered "an expensive hobby" to "enjoy the pleasure of owning a vessel". Made in 1/1200 scale they are suitable for collecting or wargaming. This scale 1" to 100' being an international recognition scale makes these models suitable for use as navigation and recognition training aids and are used for this purpose by a number of marine organizations.

Cast in fine white metal and fitted with wire masts "they are built to last" and present no difficult assembly problems. Models are supplied unpainted as many collectors wish to convert or add extra detail and finish by painting in the livery of war or peace. Colours for merchant ships are given in this catalogue for companies in whose service vessels once operated.

For the modeller and those who scratch build, a wide selection of 1/1200 scale spare parts are available. Offering many of those hard to make items and "fiddley-bits" like lifeboats, vents, gun turrets, carley floats etc., all of which give additional interest to a model.

Ensign White series offers a range of warships and fighting vessels mainly of World War 2, of classes and types that were engaged in many naval actions.

The Ensign Red series offering a range of merchant ships including lesser known vessels which served in peace and war.

New models to these ranges will be added from time to time, being advertised in the model press. For prices see separate Price Code Sheet.

When ordering please give Catalogue Number and description of item required, writing name and address in block letters.
